

DriftLight® The bright spot in the fishing world

DriftLight® for Gillnet Fishing. For marking Gillnets during a long period of time. The advantages of the **DriftLight®** :

- led's instead of strobe lights - last longer
- works on 4 pcs- 1,5 Volt AA Batteries - cheap
- robust design - durable
- light weight only 160 grams incl. batteries - easy to handle & store
- comes with pole adaptor - quick fixation to the pole
- flash and steady mode in same unit (30 fpm) - multi functional
- works for 30 nights in flashing mode, due to daylight sensor

These solid **DriftLights®** are available with red, white, amber & blue led's and are water & shockproof. Your **DriftLight®** is now available through your local distributor or marine hardware store.
