

# Indispensable inspection tool for professionals

For use as inspection tool to look inside engines, gear boxes, manifolds, hollow spaces and behind and inside walls without creating any invasive damage.

The advantage of the Endoscope **Flex-view**® at a glance:

- own internal light source with led – **last longer**
- 7.000 pixels – **clear imaging**
- robust designed sturdy aluminium case – **durable**
- 48 inch cable – **deeper penetration**
- right angle mirror – **excellent viewing range**
- 0.26 inch cable diameter – **better entrance possibilities**

These solid **Flex-view**® endoscopes are available in several models; all models are supplied with aluminium carrying suitcase. Your **Flex-view**® is now available through your local distributor or hardware store.
